

THE LEADING GLOBAL SUPPLIER OF

PORTABLE SANITATION EQUIPMENT & INFRASTRUCTURE

Version 6.1 G

Introduction

With a combined experience of over 35 years in the events industry, Splashdown has recently reached broader audiences and is setting new sanitation standards to major international events. We are a leading global supplier of portable sanitation and infrastructure for hire.

Having served well over 5,000 events, we have great expertise in ensuring clients have the appropriate facilities. With a large range of hire options, Splashdown Global is primarily focused on providing sustainable sanitation equipment to major sports and large multi day events in general. Our products are equipped with vacuum technology and have raised the bar on event facilities delivery, bringing a new concept to event operations.

In addition to standard portable toilets and bespoke luxury bathroom modules for hire, we offer a range of other services including Event Management, Planning and Consultancy, to streamline event's operations and provide a smooth experience to clients and patrons. Still, the best part of doing business with Splashdown isn't the frills and fancy design; it's the in depth knowledge of the large events industry, the reliable customer service with a smile, and about striving for unprecedented levels of customer service breaking new boundaries in water savings and waste minimization working with the most environmentally friendly & efficient toilet pans in the world to create new paradigms in sustainability.

We're here to help make one of the less glamorous aspects of event planning as simple and seamless as possible.

RICHARD CAVE & DES WITTINGSLOW, GROUP DIRECTORS

2018 Commonwealth Games

Splashdown's most significant contract to date was achieved with the successful bid to be the sole provider of toilets to the 2018 Commonwealth Games in Australia.

Splashdown knows that the vacuum systems greatly benefit International Events beyond expectation and offer the audience the best experience when compared to the standard event industry convention sanitation systems.

Splashdown used the latest sustainable equipment in the world at the 2018 Commonwealth Games in Australia to meet the sanitation needs of:

- 6,600 athletes
- 15,500 volunteers
- 1.2 million ticket holders

WELS 6 Star rated vacuum toilets and the latest water saving device enabled a saving of over 80% in water usage and reduced the levels of wastewater collection and disposal by 87% compared to the use of traditional toilet systems.

Estimated saving of 4,833,967 litres across the entire event*

*Estimates based on traditional toilet using 6 litres per flush and vacuum toilet using 0.35 litres per flush.

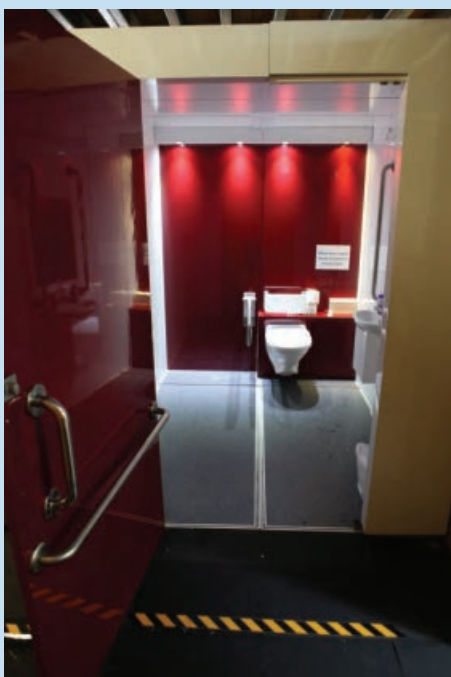

Sydney Opera House

With over 35 years of experience, we know how to make sure crowds have the right facilities. With a large range of event toilet hire options, we can take care of everything from a local one-day public event to huge arts festivals running for weeks.

Splashdown has been providing mobile sanitation for the Sydney Opera House over the years for a number of different events. We have provided Bespoke Luxury Bathroom Modules, Connect 3 vacuum toilets and other products which have consistently exceeded patrons expectations.

Our Bespoke Luxury Modules are the ultimate experience in flexibility and design and use the latest in environmentally superior vacuum technology. The units can be installed in any building with a standard doorway entrance, in any number of configurations in order to suit the event and venue.

Australian PGA Championship

Having served well over 5,000 events, we have great expertise in ensuring clients have the appropriate facilities. With a large range of hire options, Splashdown is primarily focused on providing sustainable sanitation equipment to major sports events and large multi day events.

The Australian PGA Championship is a tournament on the PGA Tour of Australasia. It is the home of the Australian PGA and dates back to 1905. Since 2000 it has been held in the South East Queensland region.

Splashdown is proud to be a regular provider of this special event with our VIP combination (male / female), Connect 6 Unit, 16 Pan building and single portable toilets.

Reading Festival, UK

Our products are equipped with vacuum technology and have raised the bar on event facilities delivery, bringing a new concept to event operations.

Reading Festival is the number one UK music festival taking place over August Bank Holiday weekend. Campsites are available and weekend tickets include camping. The Reading Festival is the world's oldest popular music festival still in existence and has hosted many of the UK's most famous acts over the years plus top overseas names.

Splashdown / A1 Mobile provide a range of products and services including toilets and showers to those staying in luxury camping areas.

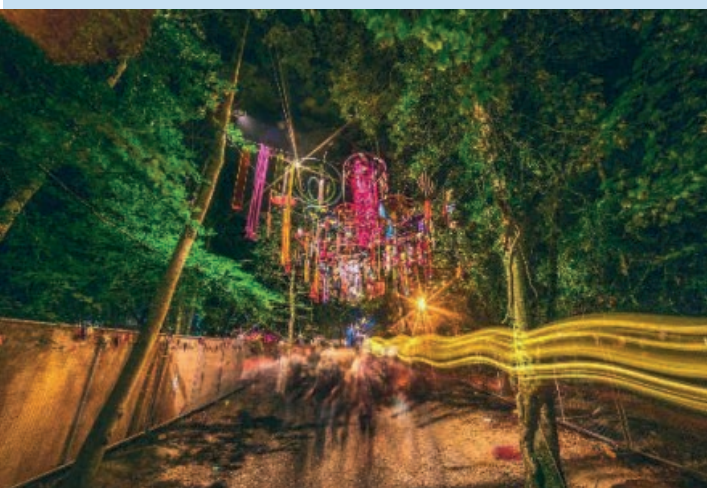

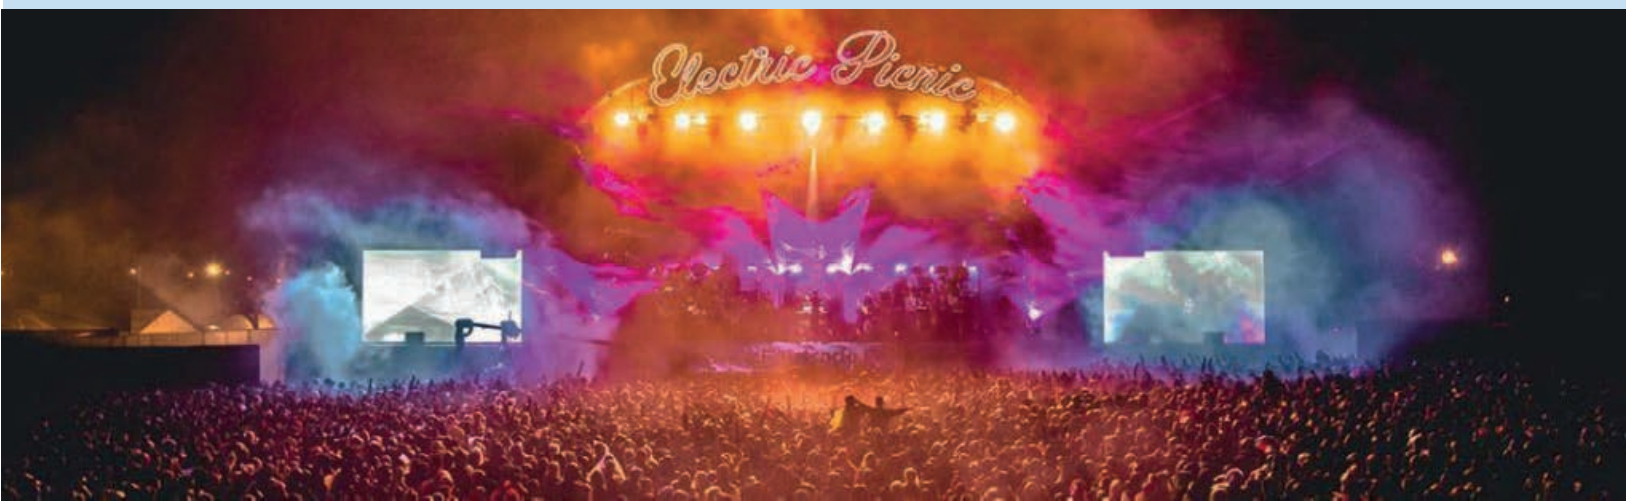

Electric Picnic Festival, Ireland

Our reliable customer service, which is at the heart of our business, has allowed us to secure recurring contracts within the large events industry.

Electric Picnic is an annual arts-and-music festival which has been staged since 2004 in Stradbally, Ireland. It was voted Best Medium-Sized European Festival at the 2010 European Festival Awards and has been voted Best Big Festival at each of the last four Irish Festival Awards since they began in 2007.

Splashdown / A1 Mobile are proud to have been a part of this unique event since 2012. We provide patrons with specialist products from our CONNECT range; including toilets and showers.

Vacuum Event Toilets (3VAC)

Splashdown introduces the first general admission vacuum event toilets. Environmentally friendly and with improved hygiene, these toilets add prestige and profitability to any event.

Features include separate hand wash facilities to speed up time in the cubicles, vacuum flush system to reduce waste total by up to 80% and efficient transport system with folding units which are stackable.

CONNECT 3 Toilets

Modern and ergonomic design with 3 individual cubicles made with medical grade materials.

Features include soft ambient lighting, digital occupancy indication lights and our unique 6 Star WELS rating vacuum toilet.

CONNECT 4 Showers

Modern and ergonomic design with 4 individual cubicles with private entrances and changing areas.

Features include integrated seating, hooks and partitioned changing area in each cubicle. The showers are designed for minimal water consumption.

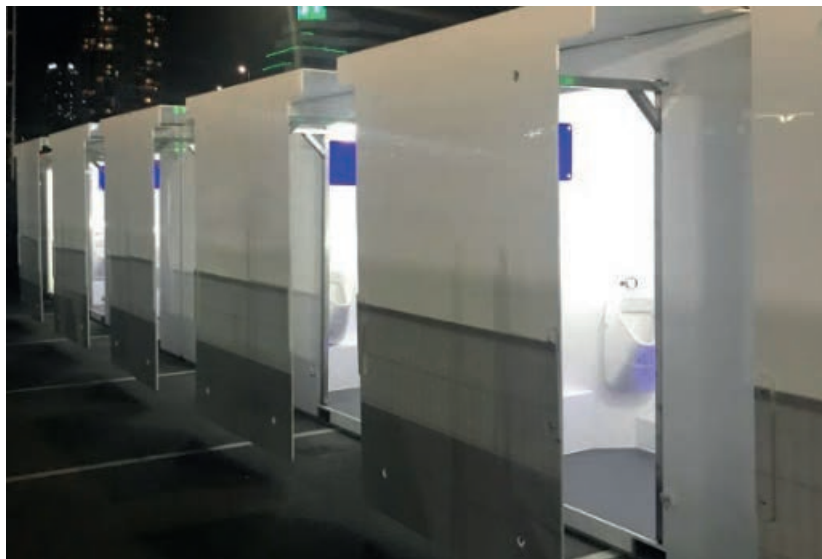

CONNECT 6 Toilets

Modern and ergonomic design with 6 individual cubicles made with medical grade materials.

Features include soft ambient lighting, digital occupancy indication lights

CONNECT 4U Urinal

Modern and ergonomic design with 4 individual cubicles with private entrances and changing areas.

Features include integrated seating, hooks and partitioned changing area in each cubicle. The showers are designed for minimal water consumption.

CONNECT Ambulant

Splashdown took the initiative to introduce the provision of portable amenities to meet the needs for people with ambulant disabilities

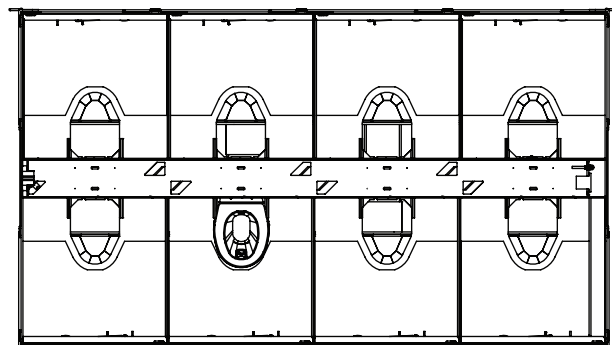

Features include our 6 star WELS rated toilet, a baby changing unit, a compact footprint and technology to meet our ISO20121 sustainability targets.

CONNECT Accessible

Splashdown's accessible toilet and shower unit combines the trademark modern and sleek design of the CONNECT range along with practical installation and transportation requirements.

Features include our 6 star WELS rated vacuum toilet, an accessible shower, a compact footprint and technology to meet our ISO20121 sustainability targets.

CONNECT 8 Toilets

Modern and ergonomical design with 8 individual cubicles ideal for general admission areas, made with medical grade materials and designed with minimal cleaning and maintenance in mind.

Features include: soft ambient lighting and digital occupancy lighting

CONNECT 15U Urinal

Modern and ergonomical design with 15 individual spaces ideal for general admission areas, made with medical grade materials and designed with minimal cleaning and maintenance in mind.

Features include: soft ambient lighting, splash floor for simple cleaning and air extraction system to mi

A connect 8 and a urinal 15 unit placed in combination, naturally creates a new option for clients by replacing a traditional 16 pan unit and now providing 23 sanitation positions in a similar ground footprint.

BESPOKE LUXURY BATHROOMS

Optional:

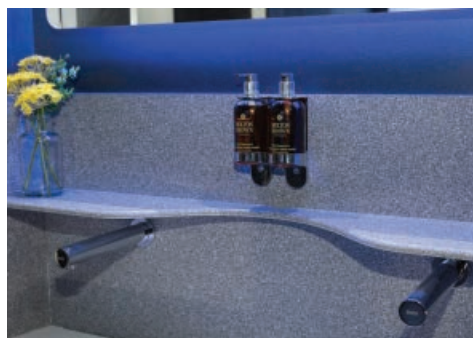

Bidet seats, air conditioning and distress help light

MODULAR VACUUM SYSTEMS

Our Bespoke Luxury Module offers the ultimate experience in flexibility and design using environmentally superior marine vacuum technology.

Features:

- Module comes in a range of 3 styles; a stand alone toilet cubicle, a 3 urinal wall panel and a stand alone vanity
- The width of the units allows them to be folded into compact components which fit through any standard doorway entrance.
- A luxury accessible module is also available.
- Custom design layouts possible for each event.

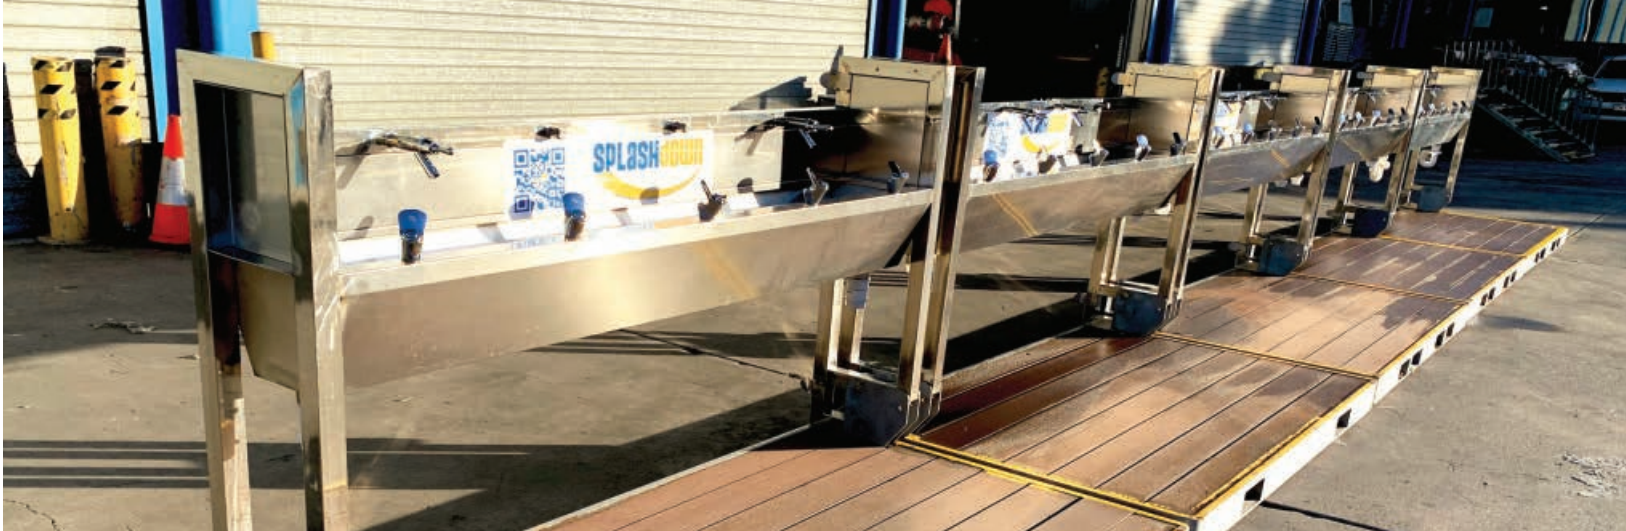

CONNECT Vanity

Splashdown's vanity unit combines the trademark modern and sleek design of the CONNECT range along with practical installation and transportation requirements.

Features include a concealed Dyson hand dryer, touchless soap dispensers, sensor taps, a large mirror, ambient lighting and a compact, foldable design for easy transportation.

Water Stations

Specially designed hydration stations for large events where access to fresh water for patrons is required. Units range from 12 to 36 drinking fountains and can be hooked to remote tanks or town water supply.

We have a variety of units to suit all your needs including bubbler and tap combination units, bottle filling stands, hydration trailers with holding tanks along with the option of connecting to mains supplies or remote tanks with most units.

STANDARD BATHROOMS

16 PAN UNITS AND URINAL UNITS

16 pan unisex

Standard/General admission bathrooms are designed to service large crowds attending sporting and music events.

All Splashdown bathrooms use 500ml fresh flush with spring loaded taps to offer maximum water and waste savings. Each building has lighting for safety and hand wash facilities with soap dispensers to ensure the highest possible hygiene standards.

Waste tanks on the 16 pan units have a 4000 L capacity – up to 2800 uses. Single units have up to 200 uses. This high capacity reduces servicing frequencies for waste trucks. This is extremely important in minimising the impact of vehicles on patrons and the environment.

Standard bathroom options:

- 16 pan unisex building
- 16 person urinal building
- Disabled/accessible toilets
- Single toilets.

16 pan unisex

16 person urinal building

16 person urinal

*This product only available in Australia

LUXURY BATHROOMS

Our Luxury bathrooms are designed to provide outdoor facilities adjacent to marquees, trade displays, catering precincts and much more.

We can provide these bathrooms to offer the best possible level of service, mindful of patron male and female ratios. All bathrooms have large vanity areas with well appointed fittings and mirrors.

The Luxury bathrooms are very well suited to weddings and private and/or corporate functions when you want comfort and something a bit more appealing to the eye.

Event managers can choose between our standard supply of paper hand towels and soap, or an upgrade to cloth hand towels and designer soaps to suit the occasion.

Luxury bathrooms can be delivered by tilt tray or crane truck. All bathrooms connect to mains water and power (waste is self contained). For areas with no mains water, remote tanks can be supplied. Lighting requires a 15 amp single phase.

Luxury bathroom options:

- Male bathroom, female bathroom, combination bathroom, duo toilet trailer and disabled/accessible toilet.
- Attendants may be provided in black and white uniforms.

*This product only available in Australia

Mobile Bathrooms

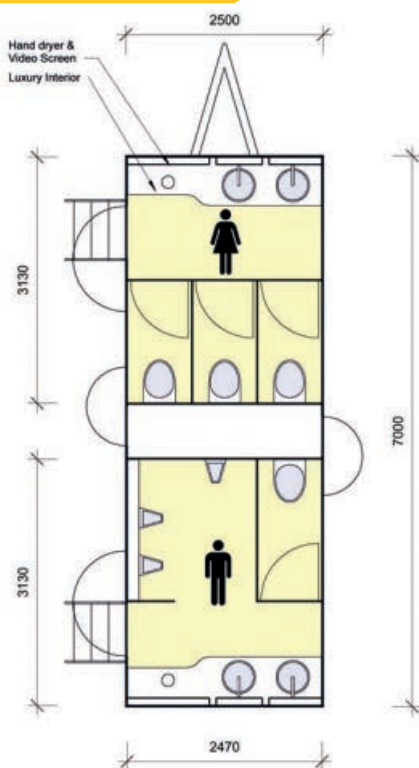

Trailer Dimensions:
3.0m (H) by 2.5m (W) by 7.1m long. Please allow 1m for step placement

- Internal & external LED lighting

PICNIC TABLES

PICNIC TABLES FOR EVENTS

These picnic-style folding tables are designed to seat a maximum of eight average sized adults.

lots to offer as professional seating:

- Simple, strong and safe design
- Stable on all surfaces — even on wet grass
- Seats eight average sized adults
- Easy access with comfortable seating
- Elegant design, attractive colour
- Wheelchair-friendly
- Easy to assemble
- Easy to clean
- Wide enough for two plates

specifications:

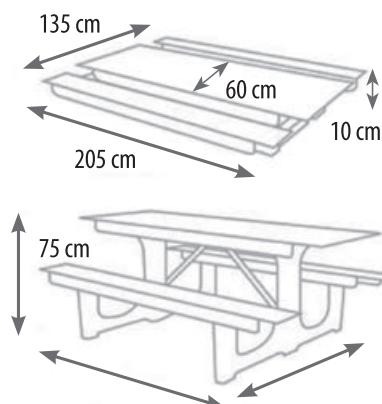

The table's width and length remain the same when set up or taken down.

The benches are 5cm shorter than the table top, which ensures that the cheeks don't get stuck if the tables are connected lengthways.

If necessary the table can be easily dismantled, splitting the unit into five separate parts for transport.

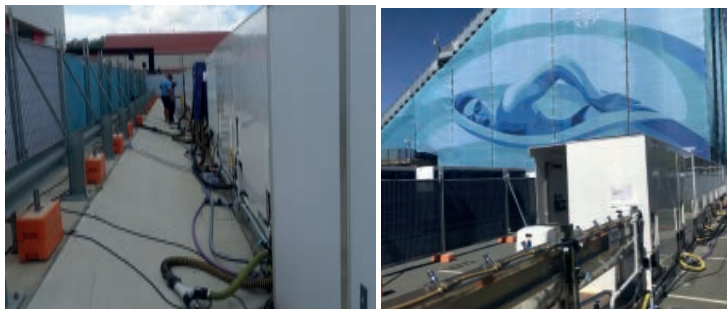

L x W	200 x 135 cm
Table top	205 x 60 cm
Bench	200 x 24 cm
Table top height	75 cm
Bench height	45 cm
Stacking height	10 cm
Weight	ca. 45 kg

WATER INFRASTRUCTURE AND EVENT PLUMBING

Splashdown events can install a temporary water infrastructure for your event large or small.

Our specialist team, headed by staff whom have major event experience from events such as The London 2012 Olympic Games & The Commonwealth Games 2018 will ensure that whatever you need, from a simple hand wash unit to banks of full flushing toilets, the water will arrive at the correct pressure and quality expected.

Potable water on demand.

Using our innovative flexi tank system and booster pumps we can deliver a variable rate supply to match the event demand, from a standalone anti tamper storage tank to larger capacity storage options.

Grey and effluent waste water

Once we have created and agreed a plan with the organisers, we are able to pump to either storage, the main sewer, or simply arrange tankering. At peak times waste can be held, and disposed of at a later time to help sewers and infrastructure.

For hard pushed sewer systems we can incorporate the use of Vacuum Toilets to minimise the pressure on local utilities.

Storage Equipment

- Potable water storage from 1,000 litres to 50,000 litres
- Potable 2,500 litre lockable anti-tamper bowser.
- Grey waste, low profile, standard tanks and high capacity 25,000 and 50,000 litre Bladder tanks.

WATER TRUCKS AND POTABLE WATER DELIVERIES

DRY HIRE WATER CARTS

CAR LICENCE WATERCARTS

Includes insurances, high visual tape in yellow, fully baffled tank, high pressure 2 inch pump, options for water hose, in cabin pump controls, outlet for garden hose, fire extinguisher, air conditioning, adjustable sprayers for rear and sides and a dripper.

Includes powerful turbo diesel light rigid truck, insurances, beacon, baffled tank, high pressure pump, 20 meters of hose and air conditioning.

TRAILER MOUNT WATERCARTS & BOWSERS

Gerni Style or Potable Water Transport

Includes insurances, fully baffled tank, high pressure 2 inch pump, 20 metres of hose on reel and a single or dual rear adjustable sprayer.

SPLASHdown

Commonwealth Games 2018

Splashdown's use of vacuum technology across the Athletes' village and sixteen sport venues has enabled a saving of over 80% in water usage and has reduced the levels of wastewater collection and disposal by 87% compared to the use of traditional systems.

**ESTIMATED SAVING
OF
4,833,967 Litres
across the
entire event**

Splashdown met the sanitation needs of:

- 6,600 athletes
- 15,000 volunteers
- 1.2 million ticket holders

Splashdown used the latest sustainable equipment in the world. WELS 6 Star rated vacuum toilets and the latest water saving devices.

Manufacturing in partnership with

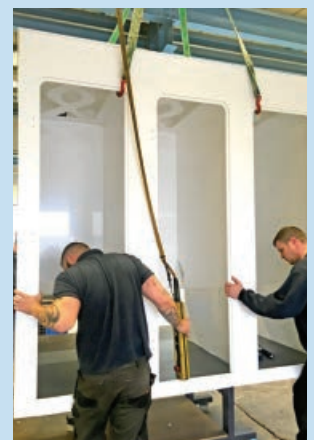

Splashdown Strong's Manufacturing Partnership

In 2014, Splashdown recognised the need for a new modern sustainable event toilet system coupled with a diverse product range. Splashdown's ultimate goals involved generating more efficient utilisation of products that may only have a one-time use in a particular country, developing more hygienic products with less areas of concern for germs and viruses, and developing a more versatile range of equipment with re-utilisation as a focus.

After conducting global research and trials, in 2015 Splashdown were pleased to sign an exclusive arrangement with Strong's Plastics of Birmingham in the UK – a leading converter of engineering-grade plastics. Over the duration of the partnership, both design teams have taken one product range at a time and thoroughly analysed how best to meet the new global requirements of raising standards, creating products with a life expectancy in excess of 20 years and at the forefront, new classic designs.

The Splashdown Strong's Partnership was created and has grown into ongoing year-on-year design and build projects.

We are very proud of the fact that our entire manufacturing and building processes take place in our three factories in Tamworth. With these factories supplying our Global Events, we intend to create a long-lasting legacy and a continuation of our valuable partnership with Strong's.

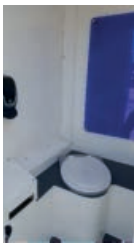

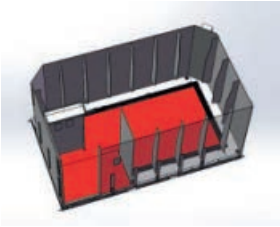

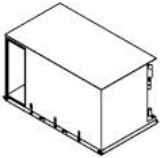

DIRECTORY OF PRODUCTS

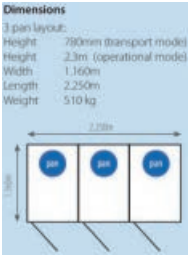

GLOBAL PRODUCT RANGE

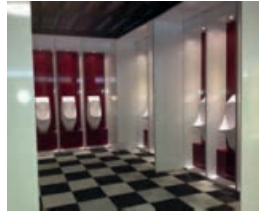

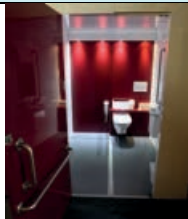

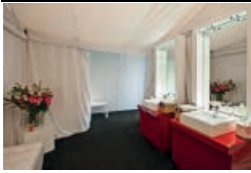

All the below range is designed for simple container transport and to not need staging, steps or ramps at point of use. Transport and shipping costs to be included.

All units will be delivered spotless clean and disinfected, and shall be returned in same conditions (Splashdown will provide personnel for inspection prior to shipping).
